

PAME-II 2013
Annotation to Agenda Item 4.1(d)
AMSA Recommendation I(A) & II(C)
AOR Final Report Recommendation 3
Report on the International Council for the Exploration of the Sea (ICES)

Recommendations for the attention of the PAME II-2013 Meeting

As ICES is expanding its Arctic-focused research, the USA, Finland, Norway and Canada recommend that PAME extend an invitation to ICES to make a presentation at the PAME-1 2014 meeting. Specifically, the four Arctic States recommend that ICES be asked to address how its present and planned programs and activities may contribute to the protection of the marine environment of the Arctic, and where there may be opportunities for collaboration.
