Status “New low sulphur fuels - fate and behavior in cold water conditions” project

PAME on-line meeting September 2020

Jon-Arve Røyset
Norwegian Coastal Administration

Background

- Norwegian projects incl. the ongoing IMAROS project
- The project approved by PAME and EPPR
- Focus: Ultra-Low and Low Sulphur hybrid- and intermediate fuel oils in Arctic environment
- Draft project plan circulated for comments April 17.
- Revised project plan June 29, 2020

The project aim

The project aims to further our knowledge of the toxicity and fate and behavior of new fuel oils in cold water conditions. Results will be described factually in order to support the integration of the project's results into marine oil spill prevention, preparedness and response activities.
